ABSTRACTED-PUB-NO: EP 285533A

BASIC-ABSTRACT:

A non-woven textile material has a textile grille covered by fibres passing through its openings to overlap and extending beyond it on each side.

The grille and fibres are pref. of polyester, glass fibres, or a mixt. of the two.

USE/ADVANTAGE - For reinforcing bituminous coatings for buildings or for composite resin-based material. The material is stable and strong and can be made quickly and stored easily.

ABSTRACT:

CHG DATE=19990617 STATUS=O> Material, based on a nonwoven textile lap, which can be used especially as a reinforcing structure for sealing coverings, which consists of a fibrous lap associated with a textile

netting, characterised in
that the textile netting is embedded within the fibrous
structure, the fibres
of which are interlaced through the interstices of said
netting and project
from the latter on each side.
